

Analysis of SMO Flight Traffic

July, 2011

John Fairweather
July 1,11-13 2011

Introduction

During the month of July 2011, concerned residents of neighborhoods surrounding Santa Monica Airport (SMO) conducted tests of airport flights in order to accurately assess the nature and makeup of the flights occurring. This report is one in an on-going series of such reports conducted by residents. The previous report analyzed traffic during May 2011. Using the same methodology described in previous reports, we can break the flights into three major categories for the purposes of analysis:

1. Flight Schools and Training Flights
2. Jet Aircraft
3. Other Prop Aircraft Traffic

The table below summarizes the findings for this report:

Date	Total Flights	Hours	Avg. Rate	Flight School %
Fri 1	81	10:30AM-3:30PM	1 per 3 mins	64
Mon 11	40	10:00AM-12:00PM	1 per 3 mins	70
Tue 12	59	12:30PM-5:00PM	1 per 4.5 mins	63
Wed 13	31	10:00AM-1:00PM	1 per 5.8 mins	58

This report is a snapshot of operations on the day(s) observed. The “Trends” section presents accumulated data from all 2011 reports to gain a more complete picture of ‘normal’ patterns. The accumulated usage percentage for all 2011 observations is Flight School 61%, Jet 9%, Other 31%.

Types of Use

For the purpose of this analysis, category 1 (Flight schools and training flights) included not only aircraft that could be directly tracked to flight school operators, but also flights that did more than one takeoff and landing within a one hour period. These flights are mostly flying round SMO's local loop in order to practice takeoffs and landings. Figure 1 below shows the breakdown of flights according to the three usage types defined above.

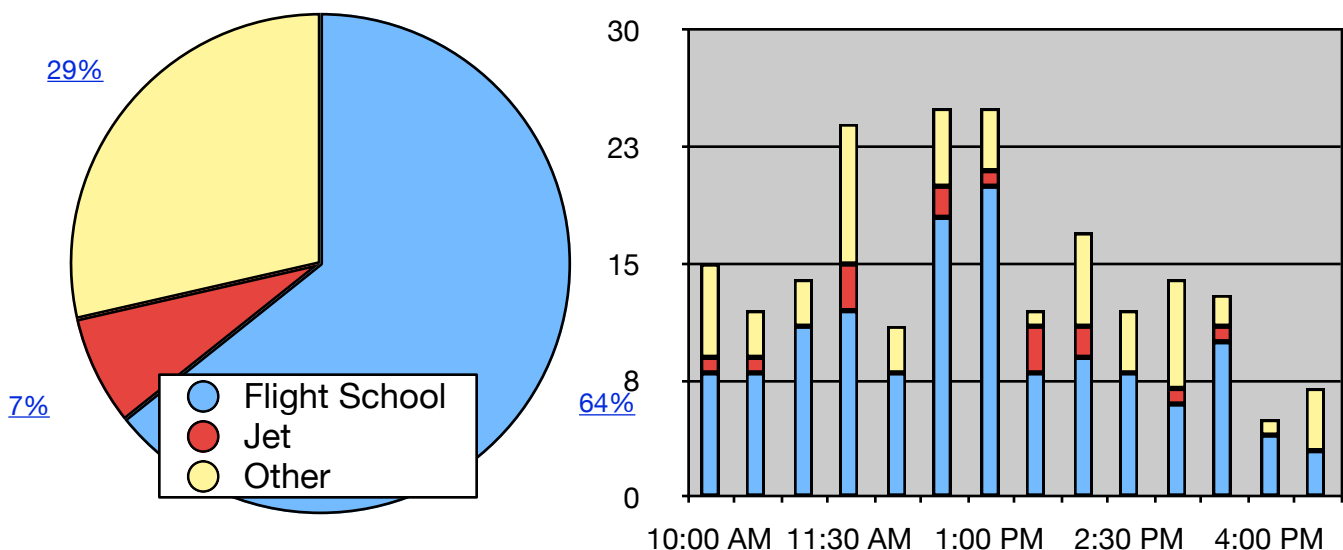

Figure 1 - Flight Breakdown by Usage Type (all days)

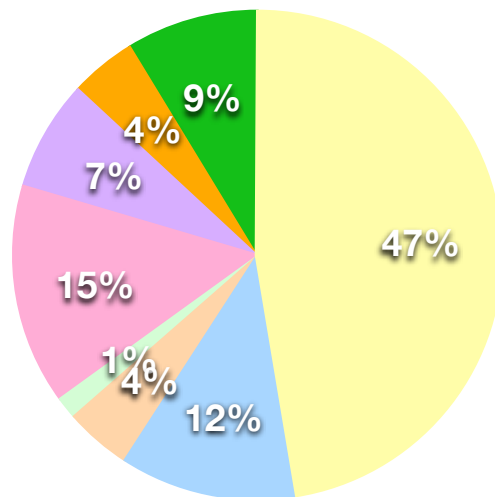

Averaged over both days, sixty percent (64%) of the flights were flight school and training related, 29% were other prop traffic, and 7% were jet traffic. As in previous reports, we have ignored helicopter traffic. The bar chart shows the distribution of these flights between the three categories over the time periods studied in this report.

Flight School Details

As this and earlier reports have shown, approximately 1/2 to 3/4 of flight traffic and noise tends to be caused by flight school operations. These percentages warrant additional analysis to compare and contrast the 'sociability' of the various flight schools operating out of SMO.

Percentage of Flights

School/Loop Traffic	Color	Flights
Justice Aviation		65
Skyward Aviation		16
Proteus Air Services		6
Santa Monica Flyers		2
American Flyers		20
Seaside Aviation	Do not provide aircraft. Instructi	
Santa Monica Aviation		10
Air-Spacers Flying Club		6
Local loop traffic		12

Notes:

1) On Friday July 1, five training related aircraft accounted for 37.5% of all observed SMO traffic:

N2092L - 11 flights (Skyward)

N830SP, N796SP, N974TA, N9448Z - 6+5+4+4 flights (Justice)

2) On Monday July 11, three training related aircraft accounted for 40% of all observed SMO traffic:

N830SP, N353MV - 6+4 flights (Justice)

N519MK - 6 flights (Michelle Cole)

3) On Tuesday July 12, three training related aircraft accounted for 34% of all observed SMO traffic:

N48204 - 7 flights (Santa Monica Aviation)

N5155Q, N974TA - 7+6 flights (Justice)

Trends

By combining the results from this and earlier studies, we can obtain a better picture of typical patterns of use over the week.

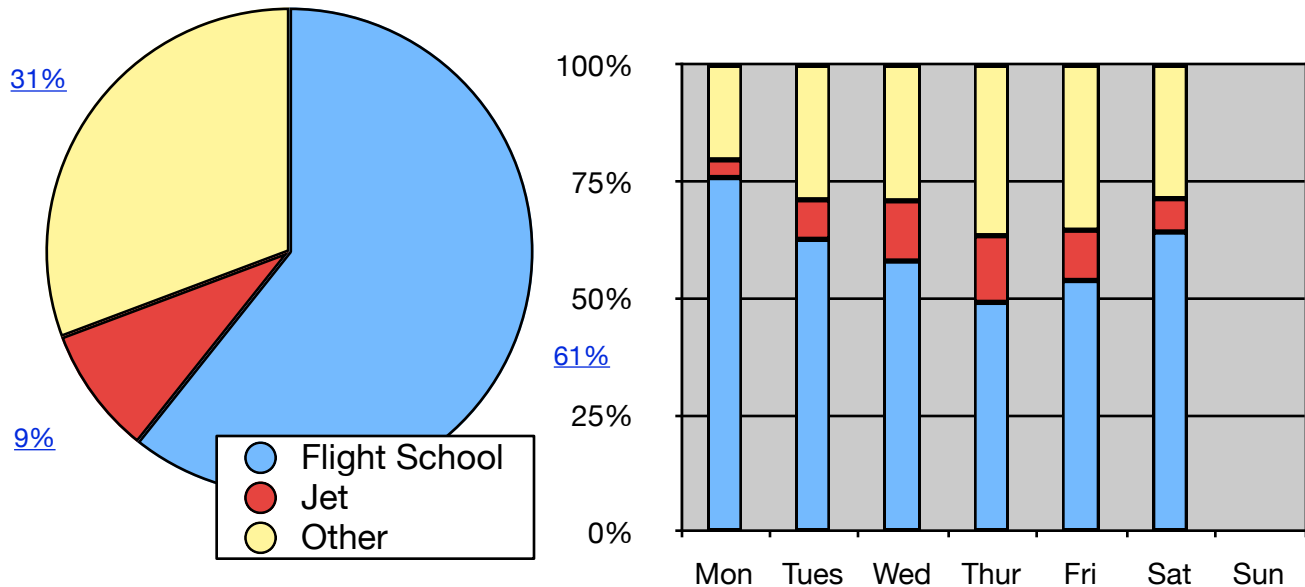

Figure 2 - Percentage of SMO Traffic by Type

The pie chart in Figure 2 above shows the accumulated percentage of all flights observed during 2011 regardless of day. It currently shows that on average 61% of all observed SMO flights are flight school related, 9% are jet traffic and the remainder is other prop traffic. This data represents a total of 560 observed flights during a combined observation time of 33 hours. The bar chart to the right shows the accumulated percentage breakdown by day of the week (for the days that we have data).

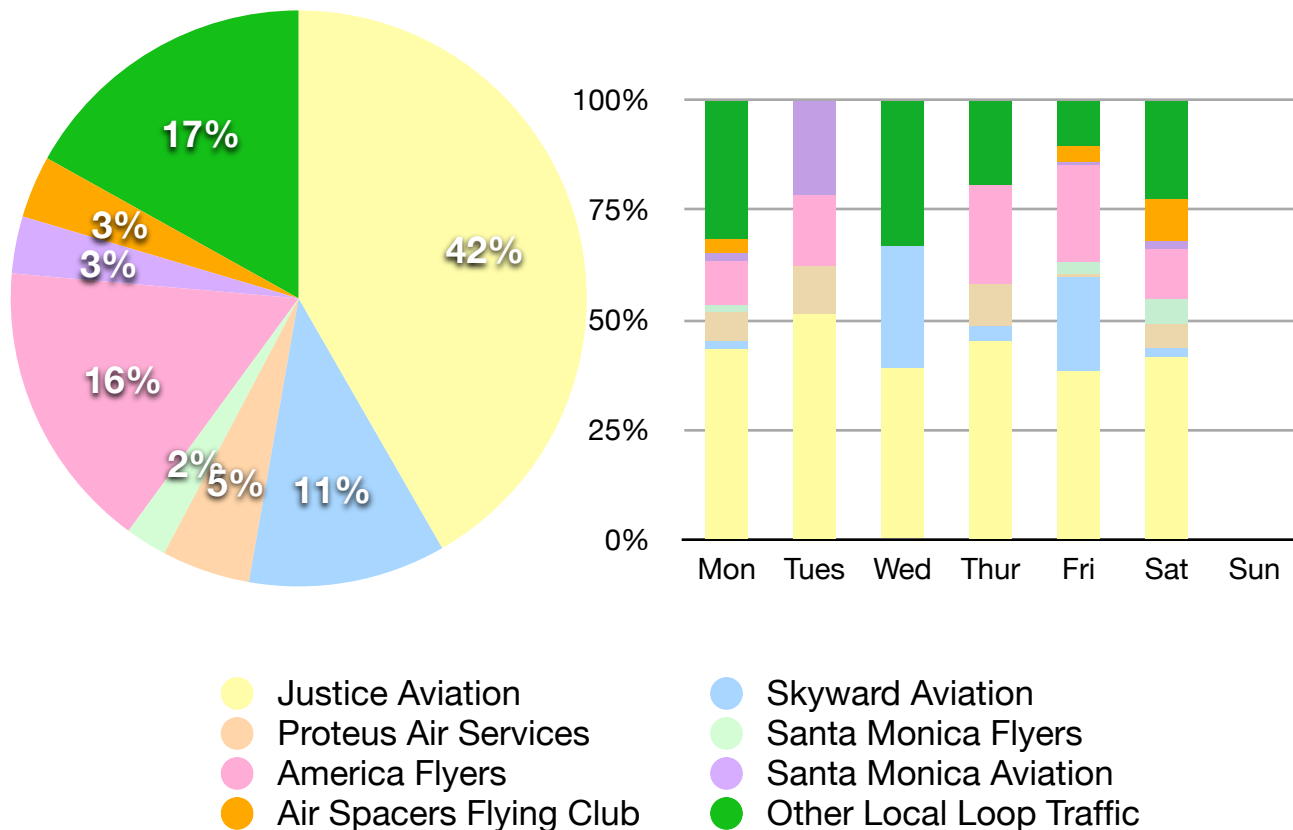

Figure 3 - Percentage of Flight School Traffic

The pie chart in Figure 3 above shows the accumulated percentage of all flight-school flights observed during 2011 regardless of day. It currently shows that Justice Aviation is the largest flight school by traffic operations (42%) followed by American Flyers (16%) and then Skyward Aviation (11%). Other local loop traffic (for which the flight school could not be positively determined) accounts for 17% of the flight & training activity. The bar chart to the right shows the accumulated percentage breakdown by day of the week (for the days that we have data).

Day of Week	Total Flights	Observed Hours
Monday	79	4
Tuesday	59	4.5
Wednesday	31	3
Thursday	63	3.5
Friday	248	13
Saturday	81	5
Sunday		

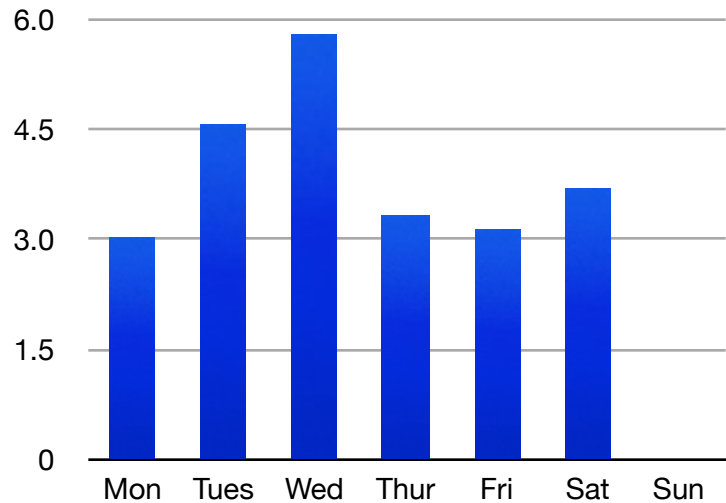

Figure 4 - Flight Departure Rate

The graph in Figure 4 above shows the accumulated average period in minutes between each SMO departure for the various days of the week (for which we have data). The shorter the bar, the more rapidly, on average, the planes are departing.
